

THE
97 PRISM

UNIVERSITY OF MAINE
LIBRARIES

RAYMOND H. FOGLER LIBRARY
ORONO

To

Lieut. Mark L. Hersey,

Our former Instructor in Military Science and Tactics,

The Class of '97

Dedicates this Volume.

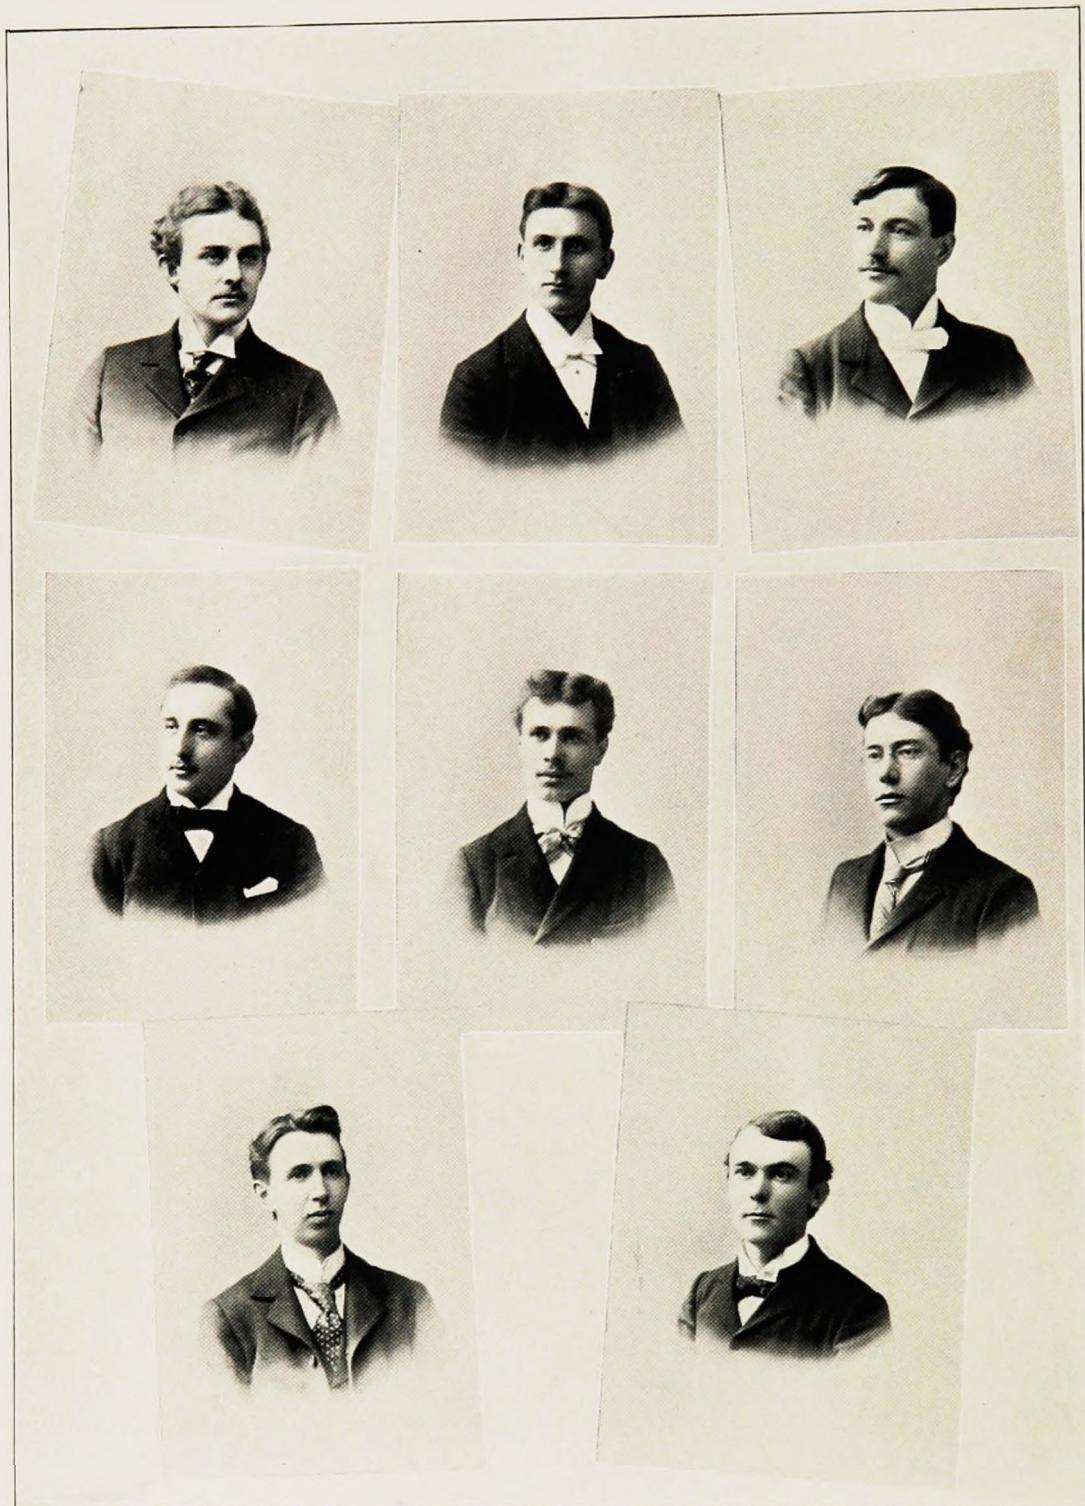

"AGAIN the shadow moveth o'er the dial plate of time," and again
THE PRISM comes forth to greet its old and new friends.

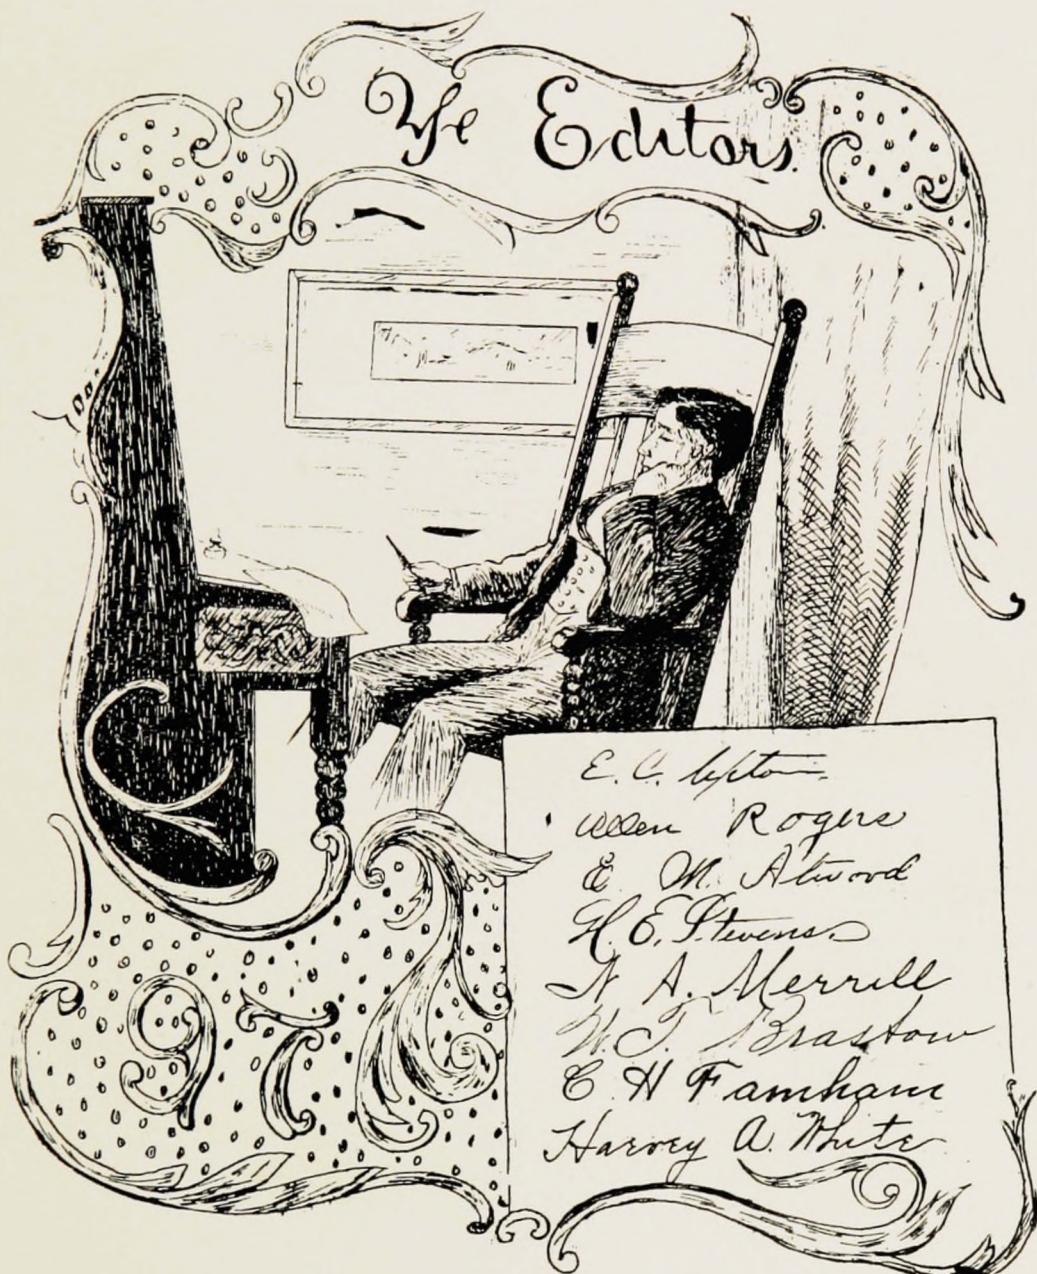

In turning the leaves of our book the reader will notice its similarity to the annuals of former years. To avoid this was an impossibility, but if the changes are few we trust the volume may not prove of less interest to those into whose hands it may fall.

We have sought to make THE PRISM a compendium of the college life in the year just past, rather than a literary production; therefore keep this thought well before you when perusing the following pages.

THE EDITORS.

Ye Editors.

Trustees.

THE HON. HENRY LORD, *President,*
BANGOR.

THE HON. WILLIAM THOMAS HAINES, B.S., LL. B., *Secretary,*
WATERVILLE.

THE HON. CHARLES PLUMMER ALLEN, B. S.,
PRESQUE ISLE.

THE HON. BENJAMIN FRANKLIN BRIGGS,
AUBURN.

GREENVILLE JEFFERSON SHAW,
HARTLAND.

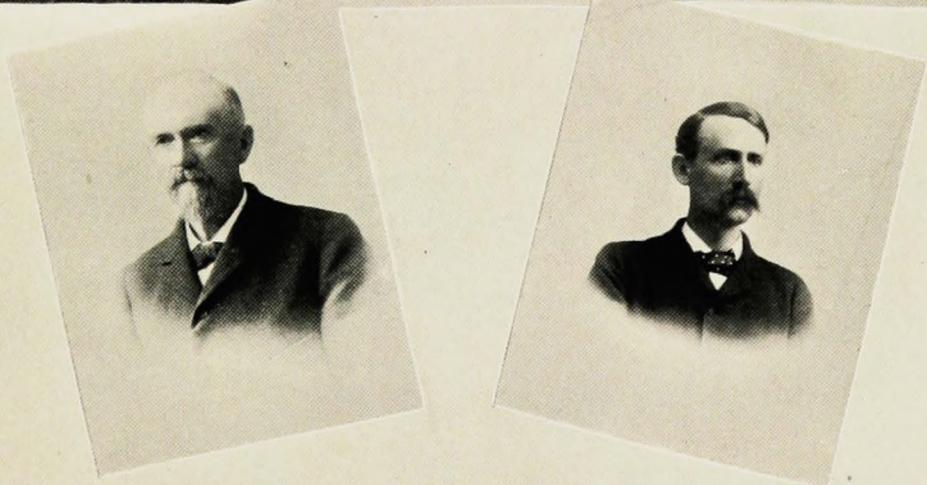

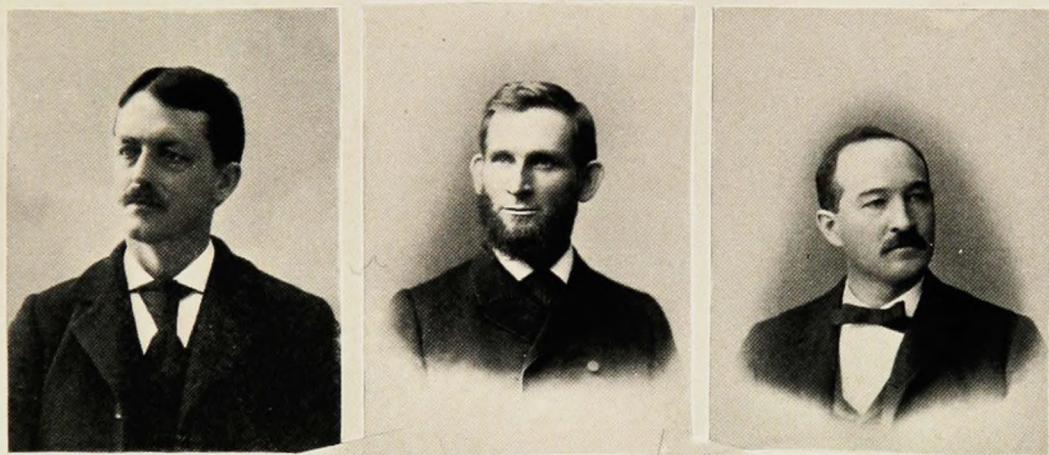

THE HON. RUSSELL BENJAMIN SHEPHERD,
SKOWHEGAN.

ARTHUR LEE MOORE, B. S.,
LIMERICK.

THE HON. ELLIOTT WOOD,
WINTHROP.

EXECUTIVE COMMITTEE.
TRUSTEES LORD, HAINES AND ALLEN.

TREASURER.
PROF. GEORGE H. HAMLIN,
ORONO.

The Maine State College,

Orono, Maine.

School of Science and Technology.

Courses:

I. LATIN SCIENTIFIC.

II. SCIENTIFIC.

III. CHEMISTRY.

IV. AGRICULTURE.

V. PHARMACY.

VI. MEDICAL PREPARATORY.

VII. CIVIL ENGINEERING.

VIII. MECHANICAL ENGINEERING.

IX. ELECTRICAL ENGINEERING.

Calendar.

FALL TERM, 1895.

September 2, Monday,	Before-term examinations begin.
September 3, Tuesday,	Entrance examinations begin.
September 4, Wednesday,	Fall term begins.
October 4, Friday,	Annual military encampment.
October 11, Friday,	
November 22, Friday,	Senior Debate.
November 26, Tuesday,	Meeting of the Board of Trustees.
November 28, Thursday,	Thanksgiving recess.
December 1, Sunday,	
December 6, Friday,	Sophomore prize declamation.
December 17, Tuesday,	Term examinations begin.
December 19, Thursday,	Term ends.

SPRING TERM, 1896.

February 3, Monday,	Before-term examinations begin.
February 4, Tuesday,	Entrance examinations begin.
February 5, Wednesday,	Spring term begins.
February 22, Saturday,	Washington's birthday.
April 30, Thursday,	Fast day.
May 8, Friday,	Arbor day.
May 30, Saturday,	Decoration day.
May 30, Saturday,	Senior vacation begins.
June 1, Monday,	Ivy Day.
June 3, Wednesday,	Farmers' field day.
June 13, Saturday,	Junior exhibition.
June 14, Sunday,	Baccalaureate sermon.

June	15, Monday,	Convocation.
June	15, Monday,	Class day.
June	15, Monday,	Commencement oration.
June	16, Tuesday,	Meeting of the Board of Trustees.
June	16, Tuesday,	Exhibition drill.
June	16, Tuesday,	Receptions by the fraternities.
June	16, Tuesday,	Reception by the President.
June	17, Wednesday,	Commencement.
June	17, Wednesday,	Commencement dinner.
June	17, Wednesday,	Meeting of the Alumni Association.
June	17, Wednesday,	Commencement concert.
June	18, Thursday,	Entrance examinations begin.

FALL TERM, 1896.

August	31, Monday,	Before-term examinations begin.
September	1, Tuesday,	Entrance examinations begin.
September	2, Wednesday,	Fall term begins.
November	20, Friday,	Senior debate.
November	24, Tuesday,	Meeting of the Board of Trustees.
November	26, Thursday, }	Thanksgiving recess.
November	29, Sunday, }	
December	4, Friday,	Sophomore prize declamation.
December	22, Tuesday,	Term examinations begin.
December	24, Thursday,	Term ends.

SPRING TERM, 1897.

February	1, Monday,	Before-term examinations begin.
February	2, Tuesday,	Entrance examinations begin.
February	3, Wednesday,	Spring term begins.
June	23, Wednesday,	Commencement.

The Experiment Station Council.

BENJAMIN FRANKLIN BRIGGS,	Auburn.
ARTHUR LEE MOORE, B. S.,	Limerick.
ELLIOTT WOOD,	Winthrop.
Committee of the Board of Trustees.	
ABRAM WINEGARDNER HARRIS, Sc. D., <i>President</i> , .	Orono.
President of the College.	
WHITMAN HOWARD JORDAN, M. S., <i>Secretary</i> , . . .	Orono.
Director of the Station.	
BENJAMIN WALKER MCKEEN,	Fryeburg.
Representative of the State Board of Agriculture.	
ORA OTIS CROSBY,	Albion.
Representative of the Maine State Grange.	
CHARLES S. POPE,	
Representative of the State Pomological Society.	
JAMES MONROE BARTLETT, M. S.,	Orono.
LUCIUS HERBERT MERRILL, B. S.,	Orono.
FRANCIS LEROY HARVEY, Ph. D.,	Orono.
FREMONT LINCOLN RUSSELL, V. S.,	Orono.
WELTON MARKS MUNSON, M. S.,	Orono.
Members of the Station Staff.	

Faculty of Instruction.

ABRAM WINEGARDNER HARRIS, Sc. D.

President.

Born at Philadelphia, Penn., 1858. Fitted for college at Friend's Central School of Philadelphia. Entered the Wesleyan University at Middletown, Conn., in 1876, and was graduated in 1880 with degree of B. A. Taught Mathematics in Williamsport Dickinson Seminary, Penn., 1880-1, and in Wesleyan University, 1881-4. Studied in Universities of Berlin and Munich, 1884-5. Taught Political Economy and History in Wesleyan University, 1885-8. Assistant Director office of Experiment Stations in U. S. Department of Agriculture, 1888-91. Director of same, 1891-3. President of Maine State College since September, 1893. *A. A. Φ.*

GEORGE H. HAMLIN, C. E.

Professor of Civil Engineering.

Born in Sidney, Me., 1850. Fitted at Waterville Classical Institute. Entered the Maine State College in the Sophomore class, February, 1871. Took the course in Civil Engineering and graduated in 1873. Was elected Instructor in Civil Engineering upon graduation and has been connected with the College in some capacity ever since. Was made Professor of Mathematics in 1878. Was made Professor of Civil Engineering in 1880, and made Treasurer of the College and Experiment Station in 1889.

ALFRED B. AUBERT, M. S.

Professor of Chemistry.

Born in New York City, April 29, 1853. Studied in private schools. Studied at the Imperial Lyceum of Strasburg, France. Took full course in Chemistry at Cornell University. B. S., 1873. Connected with M. S. C. since February, 1874. M. S., Maine State College, 1874.

ALLEN E. ROGERS, A. M.

Professor of History, Logic and Political Economy.

Born in Ellsworth, Me., April 23, 1855. A. B., Bowdoin, 1876. A. M., Bowdoin, 1880. Principal Hampden Academy, 1876-77. Attended Medical School of Maine, 1878. Professor, 1882 to date. Admitted to Penobscot Bar, 1891. Trustee Hampden Academy. Member American Economic Association. Author of "Our System of Government." *O. A. X.*

WALTER FLINT, M. E.

Professor of Mechanical Engineering.

Born April 13, 1860, Baldwin, Cumberland County, Me. Fitted for college in public schools of Baldwin. Entered Maine State College, 1878. Appointed Instructor in Shop Work, fall of 1881. B. M. E., 1882. M. E., 1885. Professor of Mechanical Engineering, 1886. Q. T. V.

WHITMAN H. JORDAN, M. S.

Director of Experiment Station and Professor of Agriculture.

Born in Raymond, Me., Oct. 27, 1851. B. S., Maine State College, 1875. Principal Dennysville High School, 1876-77. Post-graduate course in Chemistry and Physics at Cornell University, 1877-78. Assistant in Experimental and Analytical Chemistry at Wesleyan University, Middletown, Conn., 1878-79. Instructor at Maine State College, 1879-80. Professor of Agriculture and Agricultural Chemistry at the Pennsylvania State College, 1881-85. Chemist to Pennsylvania State Board of Agriculture, 1883-85. Director Maine Agricultural Experiment Station since 1885. Professor of Agriculture since 1894.

JAMES M. BARTLETT, M. S.

Chemist of the Experiment Station.

Born in Litchfield, Me., Sept. 25, 1854. Graduated at Maine State College, 1880. Chemist to Fertilizer Control Station at Pennsylvania State College, 1882-84. Chemist to the Maine Experiment Station, 1885 to date. Degree M. S. from Maine State College, 1883.

FRANCIS LEROY HARVEY, M. S., PH. D.

Professor of Natural History.

Born April 22, 1850, near Ithaca, N. Y. Early education in city schools of Ithaca. Entered the Iowa Agricultural College in 1868. Student Assistant in Chemistry for two and a half years. Curator in Entomology for Natural History Society of *Alma Mater* for three years, and President for two years. Graduated in 1872, degree B. Sc. Chair of Natural Sciences, Humboldt College, Iowa, 1874. Post-graduate course in Botany at *Alma Mater*, 1874. Harvard Summer Course in Mineralogy and Geology, 1877. From 1875-81, Chair of Theoretical and Applied Chemistry in the Arkansas Industrial University. From 1881-85, Chair of Biology, Mineralogy and Geology in the same institution. In charge of Dr. A. E. Foote's Natural History and Mineral establishment in Philadelphia, Pa., 1885-6. From 1886 to date, Chair of Natural History, Maine State College. From 1888 to date, also Botanist and Entomologist to the Maine State College Experiment Station. M. Sc. degree, 1886, from *Alma Mater*. Thesis, "The Forest Trees of Arkansas." Ph. D., 1890, Arkansas Industrial University. Thesis, "The Apple Maggot—*Trypeta pomonella*, Walsh." Author of over fifty articles on various scientific subjects. Has discovered about fifty species new to science, including fossil plants and insects, modern flowering plants, cryptogams and insects. Has had several species named after him in recognition of scientific work. *O. T. H. II.*

LUCIUS H. MERRILL, B. S.
Chemist of the Experiment Station.

Born Auburn, Me., Oct. 1, 1857. B. S., Maine State College, 1883. Department of Lithology and Physical Geology, United States National Museum, Washington, D. C., 1885-86. Chemist Maine State Experiment Station since 1886.

JAMES NORRIS HART, C. E.
Professor of Mathematics and Astronomy.

Born at Willimantic, Me. Studied at Monson Academy and Foxcroft Academy. Entered Maine State College in 1882. B. C. E., Maine State College, 1885. C. E., 1890. Took post-graduate work at Williams College and Clark University. Instructor in Mathematics and Drawing, Maine State, 1887-90. Professor of Mathematics and Astronomy since 1891. Member of New York Mathematical Society and of Astronomical Society of the Pacific. Post-graduate course at Chicago University, 1894-95. Q. T. V.

HOWARD S. WEBB, B. M. E.
Instructor, Foreman of Shops.

Born at Hartland, Me., Oct. 10, 1865. Graduated from Skowhegan High School, class of '83. Entered Maine State College in Sophomore class in fall of '84. Commenced to teach at M. S. C. in spring of '87. B. M. E., June, '87. Took course in Mechanical work at Cornell University, 1890-91. Q. T. V.

FREMONT L. RUSSELL, B. S. V. S.
Instructor in Veterinary Science, Veterinarian to Experiment Station.

Born Paris, Me., June 13, 1862. Fitted for college at Maine Wesleyan Seminary. Entered Sophomore class, 1882. B. S., 1885. New York College Surgery, 1886. Bacteriological Department of Johns Hopkins University, 1888-89. Came to Maine State College, 1889. United States Government Veterinary Inspector, 1891-94. Member Maine State Veterinary Medical Society, United States Veterinary Medical Society. Q. T. V.

NATHAN C. GROVER, C. E.
Assistant Professor of Civil Engineering.

Born in Bethel, Me., Jan. 31, 1868. Graduated from Gould's Academy, Bethel, in 1887. Entered Maine State College in fall of '87. B. C. E., 1890. Took post-graduate work at the Massachusetts Institute of Technology. Assistant Engineer Upper Coos Extension of M. C. R. R., 1890. Assistant Engineer Oxford Mountain R. R. in 1891. Assistant Professor, 1894. B. Θ. Π.

WELTON MARKS MUNSON, M. S.

Professor of Horticulture and Horticulturist of the Experiment Station.

Born at Howell, Mich. Entered Michigan Agricultural College in 1885. B. S. in '88. Assistant in Horticulture, Cornell University, 1888-91. Took special work at Cornell and at Michigan Agricultural College, 1890-92. M. S., (Mich.) 1892. Came to Maine State College as Professor of Horticulture, 1891. Member American Association for Advancement of Science, American Pomological Society, etc. $\Phi. \Delta. \Theta.$

HORACE M. ESTABROOKE, M. S., M. A.

Professor of English.

Born at Linneus, Me. Attended Houlton Academy. Entered Maine State College in 1872. B. S., Maine State College, 1876. M. S., Maine State College, 1884. Matriculated at Illinois Wesleyan University, 1886, and completed the non-resident course for the degree of Master of Arts. Received the degree of M. A. from Bowdoin in 1891. First Assistant in Gorham Normal School, 1883-91. Professor at M. S. C., 1891 to date. Attended Emerson College of Oratory. Prominent member of various educational societies and President of Maine Pedagogical Society, 1895. Q. T. V.

JAMES S. STEVENS, M. S., PH. D.

Professor of Physics.

Born in Lima, N. Y., August 21, 1864. Graduated Genessee Wesleyan Seminary, 1881. Graduated University of Rochester, 1885, B. S. Principal of High School, 1885-86. Instructor of Natural Science at Cook Academy, Havana, N. Y., 1886-91. M. S., University of Rochester, 1888. M. S., Syracuse University, 1889. Ph. D., same, 1890. Special work at the Massachusetts Institute of Technology. Connected with M. S. C., August, 1891. $\Delta. K. E.$, $\Phi. B. K.$

HARRIET CONVERSE FERNALD, M. S.

Librarian.

Born at Dover, Me. Entered Maine State College, August, 1881. B. S., Maine State College, 1884; M. S., 1888. Library School at Columbia College, 1887-88. Librarian, M. S. C., December, 1890, to date.

DAVID WILDER COLBY, B. S.

Instructor in Chemistry.

Born in Skowhegan, Me., July 2, 1863. Graduated from Skowhegan High School, 1883. Entered Maine State College in 1884. B. S., Maine State College, 1887. Took post-graduate course in Chemistry at Cornell University. Assistant Chemist to Cornell Experiment Station. Assistant Chemist Vermont Experiment Station. Instructor in Chemistry, M. S. C., 1891. $B. \Theta. \Pi.$

WINFIELD SCOTT EDGERLY.

Captain U. S. Cavalry, Professor of Military Science.

Born in Farmington, N. H., May 29, 1846. Prepared himself in public and private schools and Phillips Exeter Academy for West Point, from which place he graduated in 1870 with the appointment of 2d Lieutenant of the 7th Cavalry. Appointed 1st Lieutenant in 1876 and Captain in 1883. His first service was in Kansas, followed by two years duty in Kentucky, Mississippi, South Carolina and Alabama. He was with the escort to the Northern Boundary Survey in 1873-4. After that he was with General Terry's expedition against the hostile Sioux Indians and was engaged in the famous battle of Little Big Horn. He has seen duty in the garrison and field in Dakota, Nebraska, Montana and South Dakota, where he participated in the battle of Wounded Knee and the engagement of White Clay Creek. From 1892 to 1895 he was occupied with garrison and field duty on or near the Rio Grande. Detailed to Maine State College in 1895.

GILBERT M. GOWELL, M. S.

Professor of Animal Industry.

Born in Bowdoin, Me., March 14, 1845. Educated in the common schools and Seminary. Taught in public schools ten years. Engaged in orcharding and dairy farming for fifteen years in Maine and Kansas. President of Sagadahoc County Agricultural Society for four years. President of State Board of Agriculture, 1880-81. Farm Superintendent Maine State College, 1882-87. Instructor in Agriculture, 1891-93. Professor of Animal Industry, 1894.

HARRIS P. GOULD, B. S.

Assistant in Horticulture.

Born at North Bridgton, Me., Sept. 6, 1871. Graduated from Bridgton Academy in 1889. Maine State College, 1893. Connected with Horticultural Department, M. S. C. since August, 1892. *B. Θ. Π.*

BURTON SMITH LANPHEAR, B. S

Instructor in Electrical Engineering.

Born in Carthage, N. Y. Prepared for Cornell at Carthage High School. Entered Cornell in 1890. He was elected to the honorary society, Sigma Xi. Graduated in 1894 with the degree of M. E. in Electrical Engineering. Employed by Electric Light & Power Co., of Ithaca, N. Y., as First Electrician, which position he resigned to accept a fellowship at Cornell. At the end of the year he received the degree of M. M. E. Instructor of Electrical Engineering at Maine State College in 1895.

EDWIN BRYANT NICHOLS, B. A.

Instructor in Modern Languages.

Born at Hartford, Conn. Prepared at Hartford High School for Wesleyan University of Middleton, Conn., graduating in 1894 with the degree of A. B. and honors in the Romance Languages. Studied a year in Germany at the University of Leipzig. Accepted the position of Instructor in Modern Languages at Maine State College in 1895. *B. Θ. Π.*

WILBUR FISH JACKMAN, B. S., PH. C.

Instructor in Pharmacy.

Born in Lapeer County, Michigan. Fitted for the University of Ann Arbor in the Ann Arbor High School. Graduated from this University in 1886 with the degree of B. S., and after one year's work in the Pharmaceutical department he took the degree of Ph. C. Since then he has been engaged in the practice of Pharmacy. Instructor at M. S. C. in 1895.

ELMORE DAVID CUMMINGS, C. E.

Instructor in Civil Engineering.

Born in Indiana County, Pa., November, 1861. Entered Jefferson College at Washington, Pa., in 1883. Graduated from Cornell in 1889. Employed by Ferris & Co. as Inspector of bridge and steel building construction; afterwards Draughtsman and Assistant Engineer of the Columbus Bridge Co., Columbus, Ohio; then with J. A. Cole, C. E., of Chicago, in water works and sewer construction with contractor of steel buildings in Chicago. Since then with E. R. Corthell, C. E., as Assistant Engineer and Draughtsman in bridge construction and design, and was Instructor in Civil Engineering in Washington University, St. Louis, Mo., where he was Assistant to Prof. J. B. Johnson with whom in the winter of '94-'95 he was engaged in the testing laboratory of Washington University on the U. S. "Timber Physics" work. Made a topographical survey for a land company at Quincy, Ill., in '95. Instructor in Civil Engineering at Maine State during the past year, supplying Prof. Grover's position while he is on leave of absence.

FRANK DAMON, B. S.

Tutor in Physics.

Born in Buenos Ayres, S. A., in 1870. Fitted for college at Hampden Academy and entered Sophomore class at Maine State in 1892. Student Assistant in Physics the last two years of his course. Graduated in 1895.

WENDELL W. CHASE, B. C. E.

Instructor in Drawing.

Born in Foxcroft in 1875. Fitted for college at the Foxcroft Academy. Entered Sophomore class at Maine State in 1892. Illustrator of THE PRISM in his Junior year and of *The Cadet* in his Senior year, graduating in 1895.

HALBERT G. ROBINSON, B. C. E.

Instructor in Mathematics.

Born at Patten, Me., in 1873, and fitted for College at Patten Academy. Entered Massachusetts Institute of Technology in 1891, leaving at the end of his first year to enter the Sophomore class at Maine State in 1892. Graduated in 1895.

ORA W. KNIGHT, B. S.

Assistant in Natural History.

Born in Bangor, Me., in 1874, and fitted for college in public and private schools of Maine and California. Entered Maine State in 1891, graduating in 1895.

Professor W. H. Jordan.

PROFESSOR W. H. JORDAN, whose portrait accompanies this article, will sever his connection with Maine State College July 1, of the present year, to accept the position of Director of the Experiment Station at Geneva, New York. Professor Jordan's withdrawal is a severe loss to the College; but it is a distinct gain to the agricultural interests of the country, because he will thus be placed in a position to do more and better work than ever before. Though we deeply regret that another state has held out inducements sufficient to draw him from Maine, we cannot but have a feeling of pride in the fact that it was to a Maine man that New York turned when she wanted to fill one of her most responsible positions; and we must regard it a high compliment that her choice fell on an alumnus of Maine State College.

Professor Jordan is easily one of the foremost agricultural scientists in the United States. As an authority on animal nutrition he has probably few equals and no superiors. As an investigator he is patient, persistent, accurate. As a thinker, cautious, keen, and logical. His views are broad, his mind judicial. His generous way of looking at things is in part due to native characteristics, in part to his thorough training. A graduate of Maine State College, a post-graduate student at Cornell University, an assistant in chemistry at Wesleyan University, an instructor in agriculture at his *alma mater*, five years a professor in Pennsylvania State College, he brought to his work as Director of the

Experiment Station at Orono large scholarship and wide experience. The evidence of this is seen in the results of his investigations and the clearness and simplicity of his reports.

Professor Jordan will be greatly missed by the farmers of Maine. His presence at an institute was always evidence that work of high grade was to be expected, and this expectation was never disappointed. The breadth and accuracy of his information on all points which pertained to farming made his addresses rich in illustration and his answers to questions full and satisfactory. His logical habit of mind led him to arrange his matter in so orderly a manner that his hearers had no difficulty in grasping and holding the salient points.

He leaves us just as his powers have reached full maturity and with the prospect of many years of work before him. To his new field of labor he carries the fruit of twenty years of close study and thought, and the hearty wishes of all for his future success.

The General Alumni Association.

CHARLES S. BICKFORD, PRESIDENT, *Belfast*.
D. WILDER COLBY, RECORDING SECRETARY, *Orono*.
FRANK DAMON, CORRESPONDING SECRETARY, *Orono*.
E. M. BLANDING, TREASURER, *Bangor*.

In Memoriam.

William A. Allen, '74.

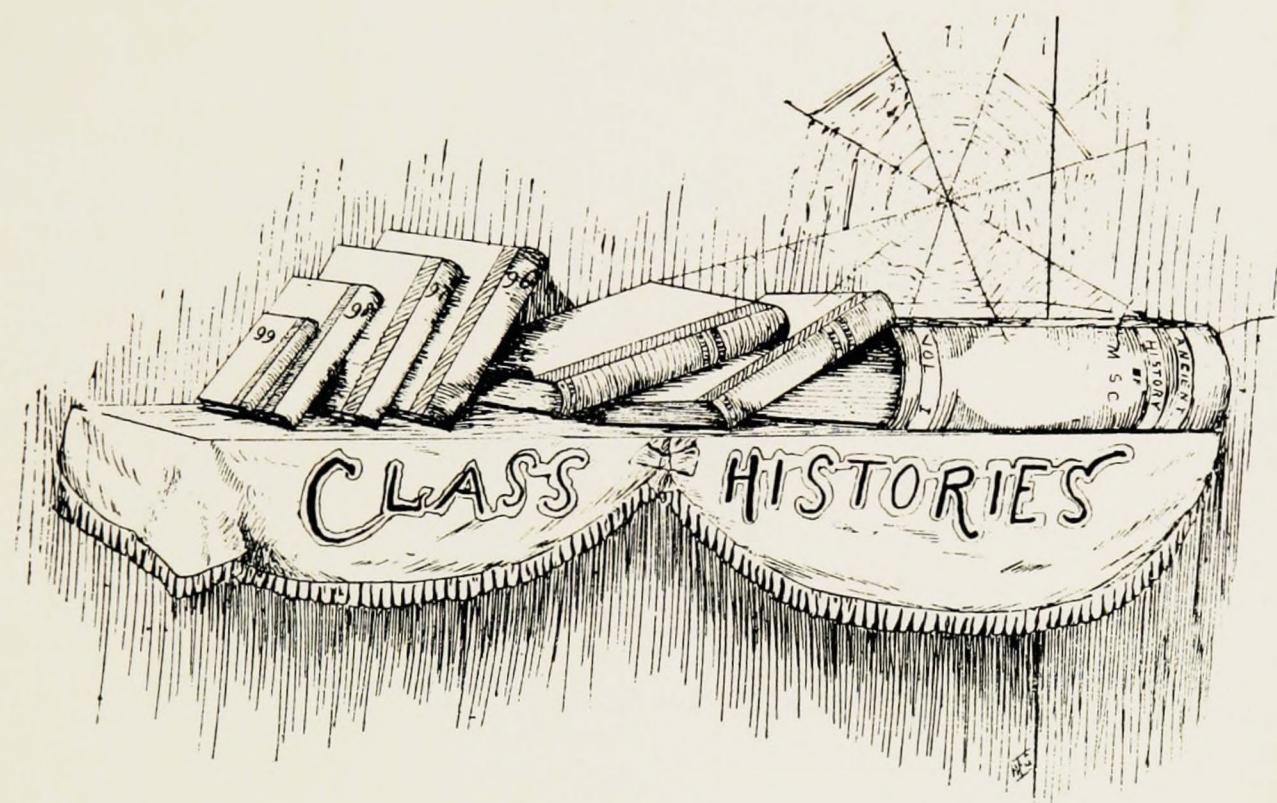

Died March 25, 1896.

Arthur Horace Taylor, '98.

Died March 21, 1896.

Harry L. Holmes, '99.

Died October 21, 1895.

Our Paean.

OH, say can you see by the bright light of morn,
As o'er the broad meadows comes sweet breath of corn,
Far up on the flag-staff, blown out by the breeze,
The ninety-five pennant wave over the trees?
With its background of white and its letters of blue,
It gleams in the sunlight o'er boys brave and true.

Though the battle was short, yet the victory great
Which brought us as champions of our Pine Tree State.
We did up the others, five games out of six,
For we were the ones who had taken the tricks.
Some called us farmers and tried to play jest,
But found in the end we were little the best.

In tennis we also show up at the head.
Was Heywood the best man? "Yes," everyone said.
Although in field sports we were young in the game,
We gained from the contest considerable fame,
And hope in the future, with brains and with muscle,
To come out ringleader, the first in the tussle.

Our training equipments of very poor nature
We hope to improve at the next legislature;
For they must now know from the work we have done,
That for each of our contests we needed some "mon,"
And if they but help us to build up a Gym.,
We'll be *in* Athletics, and not on the *rim*.

Senior History.

FOUR years ago this coming fall the class of '96 first came into existence. They appeared as minute green creatures, which the professor in natural history, after much study, classified as follows: Animal kingdom, Vertebratæ, Mammal, Primate, *Homo sapiens*; common name, freshmen. Before the arrival of these green things, Maine State College was unknown beyond a limit of ten miles, but to-day, at the close of their last year, it enjoys a rapidly increasing fame, due entirely to this wonderful and puissant class (so they think.) Like the maple leaf, which changes color at maturity, so these things, which we first encountered in all their vivid greenness, have gradually changed their hue to that of brown and white. They received the hardships of Oak Hall life like men, and also received without a murmur the water which came rushing down four stories.

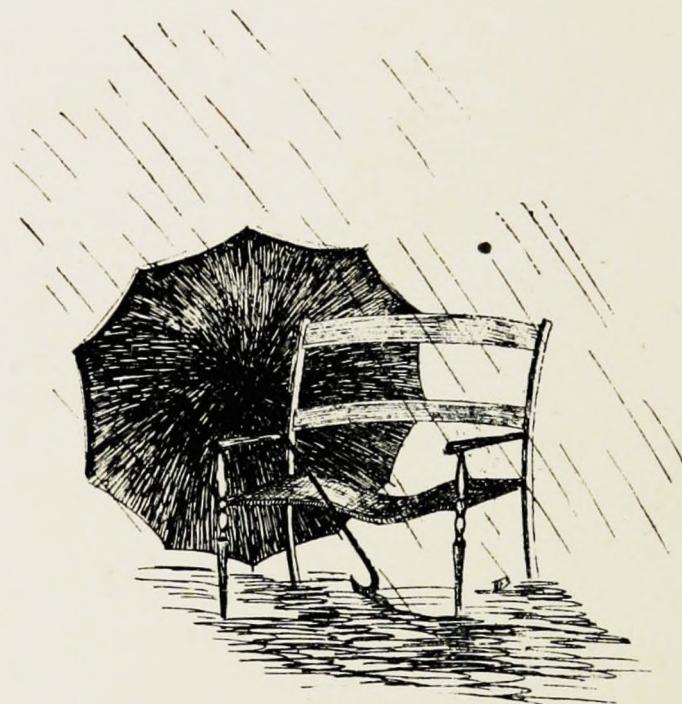

In their first year at base ball they were unsuccessful and furnished the peanuts with the few pennies which they had obtained from P. M. labor on the farm.

As Sophomores they were very successful, driving the Freshmen at will, and demolishing every door which was barred against them. Their dummies were well made and not infrequently to the point. They defeated the Freshmen in both base ball and foot ball, and

received the peanuts which were freely given. At a fire drill, one of them discovering smoke issuing from a Freshman, feared for his life and deluged him with water, but curiously enough, the faculty entertained a different view of the matter, and saw fit to allow him a visit to the paternal roof-tree.

In athletics and in the recitation room the boys of '96 hold an unbroken record of victories and honors—they have done themselves "proud."

With pride and with veneration we bid adieu to these struggling heroes, whose footsteps will no more resound through the halls of our alma mater, trusting that through life, laurels may be awarded to them as plentifully as they have been in the past four years.

Junior History.

T seems hardly possible that three years of our course at the M. S. C. have nearly expired, yet as records show it to be a fact, we must accept it, and look forward to the time when we shall be dignified Seniors, with the good behavior of the student body in our hands and the task of leading Maine State's little army through the battles of the coming year. Let us not think too much of the future, but dwell for a moment on the past.

On the 29th of August, 1893, we made our first appearance on the campus. What we lacked in quantity we made up in quality, and owing to our studious achievements, soon won respect. It was also evident that no one Sophomore desired to tackle any of our number more than once. After being initiated into the mysteries of college life

and its occasional scraps, we closed our Freshman year with happy thoughts, wishing away the summer vacation that we might come back to take our turn at the Sophomore wheel.

Somewhat to our disappointment, on returning we found that our number had diminished. But with a true heart and a steady hand we took up the task which lay before us, and were not slow in making the Freshmen to know their place. They were marshalled out to take the usual midnight parade, obeying the sharp orders, "Freshmen, fall in, right face, forward march!" Since then some of the men of '98 have won great fame as pedestrians, which we hold is due to the heel and toe movement taught them on that eventful night. The diamond was scraped in the usual custom, and under our good supervision it received a most thorough cleaning. The remainder of the year was not wholly uneventful, for Old Prob. often predicted showers which materialized by buckets full, by bags full, by scuttles full, by squirt-guns, and even through the hydrants.

Some of our number, becoming quite apt with the strop and razor, proceeded to skillfully lessen the hirsute facial adornment on the superior labium of some of the Freshmen. It was noticed that this was a warning to the cultivators of superfluous growths of hair.

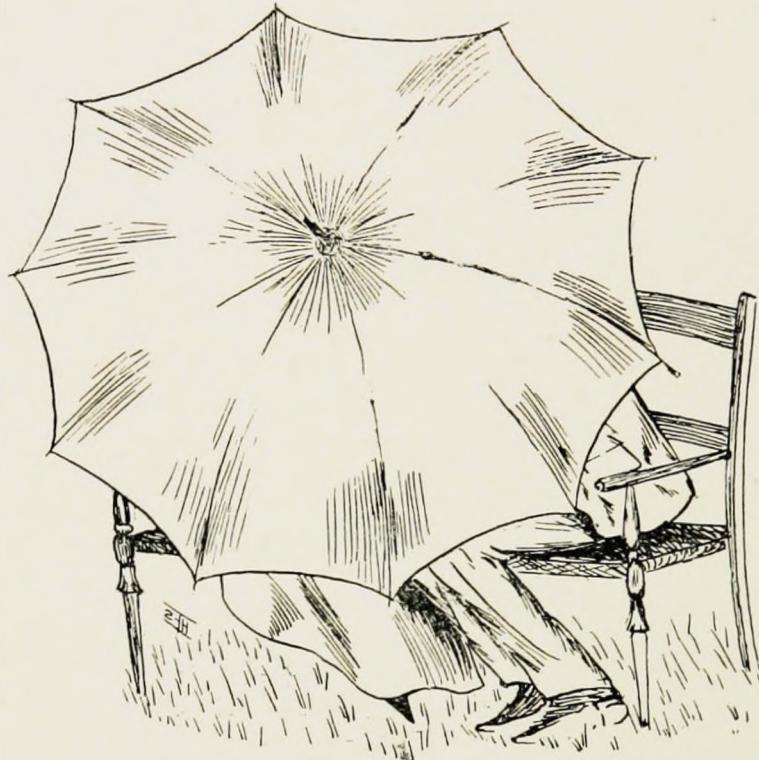

Among some of the social events of this period we recall with much pleasure our Ivy Day and banquet, which occurred on the 29th of May. This day, which is a gala day to all Sophomores, was likewise so in the present case. The participants in the programme rendered their parts creditably, while the hatchet, pearl feeder, H_2S generator and dumb-bell each found its rightful owner. We planted our ivy in front of Coburn Hall to perpetuate our memory and the evening of the same day found us in Bangor, where we held the banquet. Thus the '97 banner waved triumphant during our second year.

The following September, called together by the opening of College, we met as sturdy Juniors. This reputation we are sure we sustained ; for whoever noticed our career must have marked that, like

“Spires whose silent fingers point to Heaven
Was the fall deportment of dear Ninety-Seven.”

At the commencement of the spring term of the present year, we held the annual Junior Promenade, which we are glad to say was a success in all respects.

Thus briefly is a history of our doings in and out of College. For our ability as a class you may judge from THE PRISM before you.

Sophomore History.

N attempting to disclose to the wondering eyes of the public the doings of this illustrious class, the writer finds himself almost at a loss to clothe his thoughts with words of sufficient admiration.

They have always been a large class; in point of numbers they exceeded any previous class.

After arriving at the College, with the customary eagerness of Freshmen, they artistically scraped the diamond, and as cheerfully and gracefully

turned out for the midnight parade as all Freshmen should. But they fretted under their restraints and endeavored to show to other people that they were (so they thought) "up to date." But pride in all such cases must have a fall, and Freshmen must be made to remember that there are other people in college besides themselves, who should be obeyed and respected accordingly. So these dear boys from the rural districts learned the same painful lessons as are being learned year after year.

The peanut game came. Bounce was there. '98, amid great excitement, also scrapping, won the game. The peanuts came. Bounce was again present (or accounted for.) The Freshmen were already smacking their lips in anticipation of a good thing when suddenly the peanuts, bag and all, bounced from the window and disappeared. Great excitement among the Freshmen; but the peanuts, alas! were never found.

But '98 may well be proud of herself and her members. Well do we remember the ponderous form of Haggerty rushing down the stairs of Oak Hall and looking *so* thirsty. Oh! what a shape (to wet)! With what admiration must the awakening Freshman in camp this fall have looked from his tent door and seen him resplendent in his golden chevrons, his manly breast heaving to the accompaniment of "I can't get 'em up."

As athletes, '98 has shown up very well on the base ball and foot ball field and in track athletics; but they can none of them equal the spirited dash which Joe did from Stillwater to the campus, when chased by the Stillwater "muckers."

They are marksmen, too. You have all heard of the skill of John Dugan with the rifle; but it is doubtful if he is regarded any more dangerous than Corbett with his eyes flashing along the shining surface of a double-barreled squirt gun. For they are Sophomores now, and are doing good work in College, and we may safely say they will be heard of again in College and out.

In the early part of the spring term of this year the class lost, by death, one of its most popular members—Arthur H. Taylor. His death was mourned by all who knew him.

Freshman History.

HE first question that entered one's mind on looking over the entering class of the fall of '95 was, "Where did they all come from?"

Freshmen seemed to be everywhere. In chapel they occupied the whole of one side, and their "abiding places" were scattered all along the road from Bangor to Oldtown.

If the well-trained Sophomores felt dismayed at the prospect of the task of properly training such an aggregation of verdant youths, panting to distinguish themselves, they are not to be blamed, for the campus was literally covered with Freshmen waiting to be initiated into the mysteries of college life, and more particularly, Freshmen life at the M. S. C.

They were soon introduced to military life, and brought to "assume the position of a soldier" under the supervision of Major Marston. The sand-bag exercises being omitted owing to lack of time, they were not as well set up at the time of going into camp as former classes have been.

One of the first exploits after arriving on the campus was to give a midnight athletic exhibition, to which only a limited number were invited. Accompanied by the Sophomores as chaperones, they repaired to the Orono trotting park, where "Nelson" showed his wonderful machine-like gait and powers of endurance in a hotly contested race, and where several other fine records were made. They scraped the

diamond very well, considering that they knocked off when they got tired. In the "peanut" game the Freshmen clearly outplayed the Sophomores throughout the game, but at the very last of the ninth inning fickle fortune smiled on the "Sophs," who won the game by the small margin of one, the score standing 11 to 10. The class game of foot ball was the best ever seen on the campus. While, much to the surprise of everyone, neither side scored, yet the game was a triumph for the Freshmen, who kept the ball in '98's territory during the entire game and clearly outplayed their opponents.

It would not be right to pass over in silence the loss that the class met with in the death of Harry L. Holmes of Augusta, who died of appendicitis, October 21, 1895. His death threw a feeling of sadness over the entire College.

There is considerable base ball and foot ball talent in the class, which will undoubtedly help us out in athletics. With the material that it contains, we can safely predict a brilliant future for the class of '99, and shall read with interest their history as it appears in future editions of **THE PRISM**.

When on the desert's tawny sand,
A bubbling spring is seen;
The Chieftain leads his thirsty band
To groves of tender green.

But from the Lotus' sensuous charms
Springs forth Forgetfulness;
And Dreams by fronds of rolling palms
The band to sleep caress.

* * * * *

Adown the wastes of Knowledge's vale,
Of man's scholastic lore,
The co-eds Lotus-like assail;
He dreams forevermore.

The Annual Encampment.

N the small hours of the morning of the 5th of October, 1895, we were awakened from our slumbers by the lusty sound of Haggerty's bugle, only to array ourselves in the neat and serviceable uniform, answer to roll call, procure our little bag of doughnuts, and to await the Adjutant's call.

The battalion having been formed we started at a brisk march for the Webster station, which was reached in the course of fifteen minutes. But upon arrival, somewhat to our dismay, learned that the train was considerably behind time. This seemed to greatly trouble the Major, for he proceeded to pass away the time by drilling on the manual of arms. As the old saying goes, "patient waiters are no losers;" we soon saw the iron horse moving up to the station, as if in doubt whether it was safe or not to advance on such a gathering. However, we were hurried on board and upon our way to the pleasant village of Presque Isle, where we arrived after many hours of travel through the unsettled districts of Northern Maine, with its beautiful lakes and extensive forests. By that time our watches showed

the minute hand creeping slowly up to the figure twelve, with the hour hand nearly on two. A hungrier set of beings were never seen, for our doughnuts were gone, having devoured them almost before we had started upon our journey. So while the baggage was being taken from the cars we put off for a dining room across the way. The proprietor was not expecting such a gathering, so could accommodate only a few. The remainder were not discouraged, but repaired to a grocery store, where crackers and cheese went like hot cakes.

When we had satisfied our appetites we fell in and marched through the town to the new quarters, which was christened Camp Henry B. Cleaves. The tents were soon pitched, blankets issued, and by the time that everything was in readiness, the familiar notes of the bugles, as they sounded mess call, reverberated through the air. In a jiffy we had placed ourselves at the table, but where we had expected to see some dainty dishes, there was only a great quantity of our usual food, *baked beans*, as white and hard as if they had just been plucked from their mother vines. However, being very hungry, we relished these buck-shot beans as if they had been *turkeys*. You can well imagine our displeasure on coming to breakfast the next morning to find the same rations awaiting us; then served again for dinner and supper until the song of the day became :

Beans for breakfast,
Beans for dinner,
Beans for supper,
Beans! beans! beans!

But this programme was not always to last, and much to the discomfort of the cook upon rising one morning to prepare the usual menu, he discovered that two of the half bushel kettles (which of course contained beans) had disappeared, and after much hunting found them prostrate upon the ground, a sight to make the strong tremble. Somehow from this harsh act he decided to feed us no more on beans, and therefore our food became much better and somewhat varied.

As to the young ladies of Presque Isle I will say but little, for where there is naught to talk about there is naught to say. But upon further thought I do remember that on one occasion there were as many as six females appeared at our camp.

The chief source of amusement was in hovering over the camp fire with our thick coats on our backs and the cape drawn tightly over the head to keep out the searching winds which blew direct from the North Pole.

One characteristic of this encampment was the amount of ice cut by the Freshmen, not perhaps, though, as the slang phrase goes, but that which was formed during the night in the barrels which contained the wash water.

From the nearness to the border line of Uncle Sam's property and that of Queen Victoria's, it was a great desire of many to say that they had been out of the United States, so on several occasions there were parties who went across the line, while in nearly every case valises were carried along in which to bring back anything that should be purchased on the Canadian side of the Iron Post.

Another feature of our encampment was a sturdy pedestrian, who was about camp every day and gave record-breaking exhibitions in that line of athletics. Notwithstanding the great crowd that gathered when he gave an exhibition, he made one one-hundred yard dash in nine and one-half seconds, then fell out of breath at the feet of his trainers.

On the whole we spent a most profitable encampment. There being very good drill grounds, we received much instruction in extended order and battalion drill. The guard mount was in every case carried out to perfection, while much attention was paid to company drills. And under the able supervision of our new commander we believe that our battalion will hold its name as being the best drilled military organization in the State of Maine.

I could go on and mention many other things that happened during our stay, but as my space is limited, I shall be obliged to leave them

out, except that we as editors of THE PRISM, in behalf of the student body, greatly thank the members of the Aroostook Alumni Association for the kindness they showed in rendering to us a reception which was a very enjoyable occasion to those who participated.

Base Ball Realization.

AT last our expectations have been fully realized—we have won the pennant. We are proud of our last year's team and justly. Our success was due in great part to the whole-heartedness with which the team went into the work, but we must attribute some of it to the faithful work of our coach, Harry Miller.

This year, with all of the Maine Colleges in the league and base ball prospects looking very bright, we may expect a lively race for the pennant.

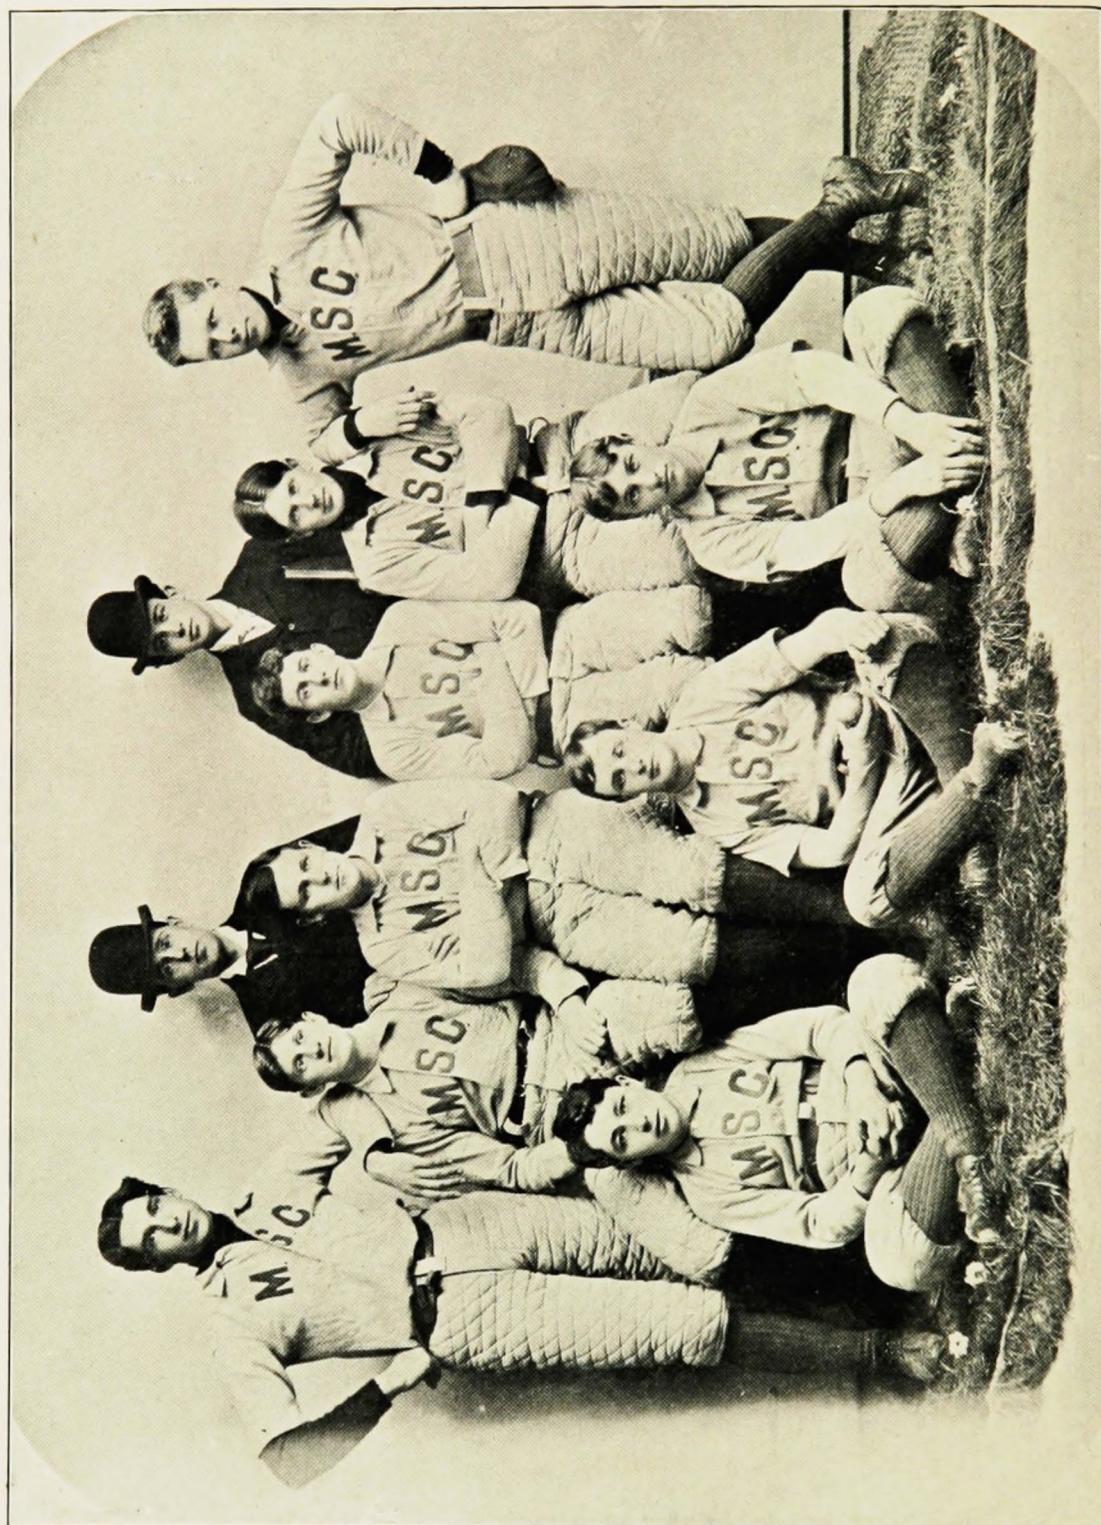

With the advent of this spring we again realized our need of a gymnasium but this difficulty was overcome by placing the men in training in the Bangor Y. M. C. A. gymnasium.

We lost three men by graduation last year but their places will be well filled by new men.

This year the team will make its first trip out of the State to play Massachusetts and New Hampshire college teams. This will prove of advantage to the college, for it will bring our team into more prominence outside of the State.

We may safely say that base ball has never had a more promising start than it has this year. Take off your sweaters, boys, take Dana's Sarsaparilla and play ball.

What we want is lots of base ball spirit and remember, my gentle enthusiast, that money counts and athletic assessments must be paid.

Throwing 16-pound hammer,	A. L. GROVER, '99,	76 ft. 4 in.
Putting 16-pound shot,	A. L. GROVER, '99,	34 ft. 4 in.

Track and Field Athletics.

YOUNG! I guess we are. Green! we know we are, yet Maine State held second place in the first intercollegiate field meet. Bowdoin was confident of taking first place, Bates and Colby vied with each other for second, and all with one consent generously gave Maine State the fourth position. We held our peace but counted on third place and lo! when the day was done, Maine State had won second.

It is something we have cause to be proud of, for it is our first encounter with the outside world, and almost our first attempt in field and track athletics. Two years ago we inaugurated a field day which we felt was some progress in our athletics, and last year the advance was still more marked. The large classes of the past two years have helped much by furnishing more competition, but we can not reach a high standard while we have no place in which to train for these contests. It is almost useless for us to hope ever to make much progress in athletics until we have a gymnasium upon our campus. A gymnasium is something that is needed more than any other thing in connection with our college. The students of the college have worked hard for its advancement, they have done their part, but when they ask for a well regulated gymnasium that the college may stand on an equal footing with its contemporaries, members of the legislature hold up their hands in horror at such useless extravagance, and inform us that we are sent here to study farming, and not to waste our time in such tomfoolery as playing ball, and seeing who can run fastest. If the State cannot afford to furnish its college with the equipments necessary to keep it on a standard with the other colleges she had better close her doors and sell out.

Winners of College Tournament, 1895.

H. H. HEYWOOD, '96,

E. E. GIBBS, '96.

Maine Intercollegiate Tennis Association.

A. P. COOK, Bowdoin, President.
 C. S. DILLINGHAM, . . . Maine State, Vice President.
 R. B. STANLEY, Bates, Secretary.
 T. R. PIERCE, Colby, Treasurer.

Score of the Intercollegiate Tennis Tournament,

HELD AT PORTLAND, JUNE 4, 5, 6, 7, 1895.

SINGLES.

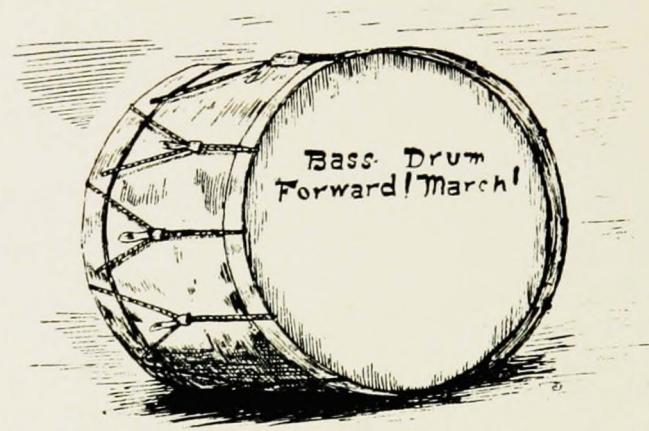

DANA, Bowdoin—HILTON, Bates,	6-4	6-3
PETTIGREW, Bates—GIBBS, Maine State,	6-2	6-2
WEBSTER, Bowdoin—KING, Colby,	6-3	6-4
HEYWOOD, Maine State—MCFADDEN, Colby,	6-4	6-2
PETTIGREW, Bates—DANA, Bowdoin,	0-6	6-1 10-8
HEYWOOD, Maine State—WEBSTER, Bowdoin,	2-6	6-2 6-4
HEYWOOD, Maine State—PETTIGREW, Bates,	1-6	6-2 3-6 6-4 6-4

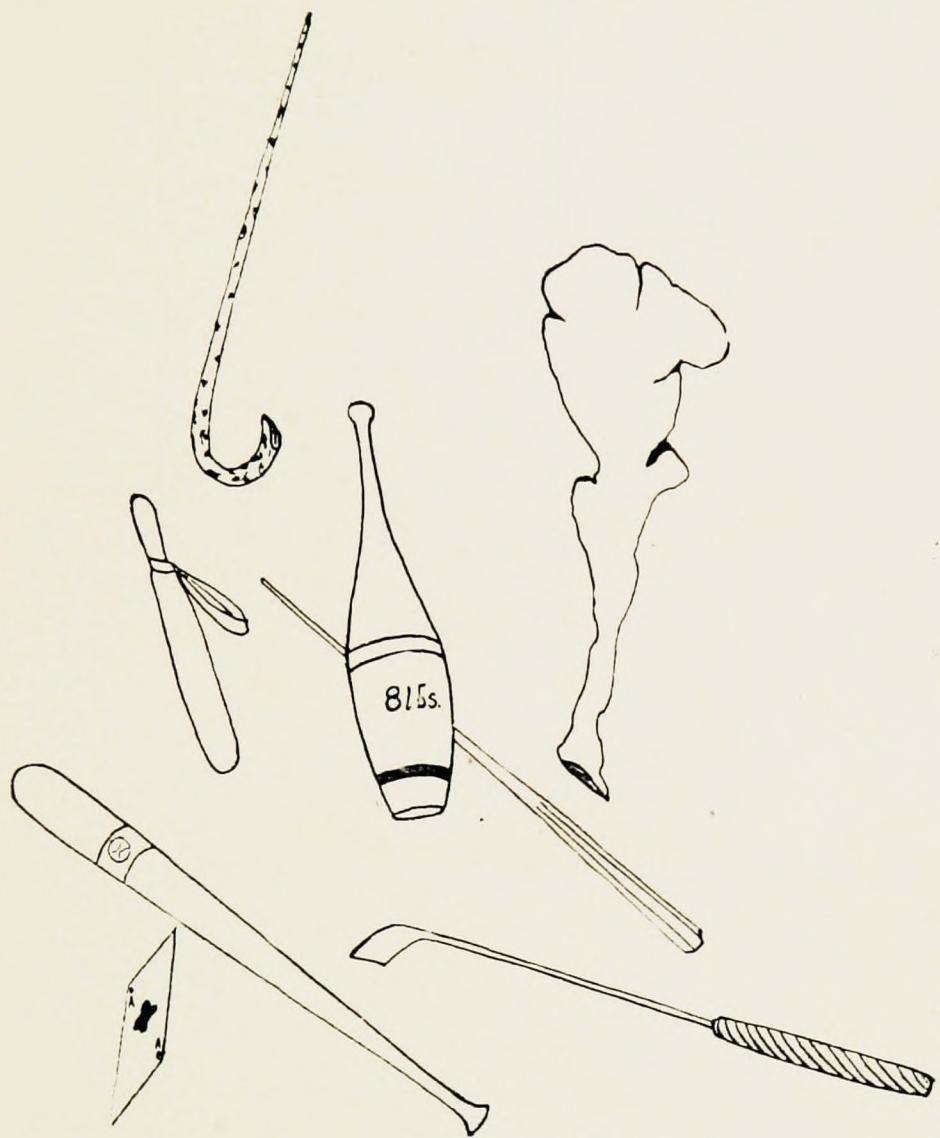

DOUBLES.

DANA and IVES, Bowdoin—BOOTHBAY and STANLEY, Bates, . . .	6-3	3-6	6-4
DANA and FOGG, Bowdoin—HEYWOOD and GIBBS, M. S. C., . . .	6-2	1-6	7-5

Our Faculty.

Who teaches us the morals true,
Preached from his sermons old and new,
Of chapel manners not to rue?

'Tis "Prexie."

Who shows us, in the space unknown,
That where we thought our Heavenly Throne,
There little worlds from stars are grown?

'Tis "Janie."

Who argues from that Darwin stand
That we're not made of moistened sand,
As thought our sires of fatherland?

'Tis "Fossil."

Who teaches us to reason straight,
And never a blind phrase to state,
But always one that carries weight?

'Tis "Allie."

Who talks to us of men of yore,
In that broad field of literature
That down through ages will endure?

'Tis "Honey."

Who shows us different compounds vile,
That we may make to pass the while,
And use them in the proper style?

'Tis "Jonnie."

Who is the one with Leyden jar,
That has the last year been afar;
Who's much afraid his lab. we'll scar?
 'Tis "Jimmie."

Who teaches us to build a bridge,
To place a standpipe on a ridge,
And pass a railroad round a hedge?
 'Tis "Boliver."

Who shows us how a board to sever,
To build an engine with a lever?
But, to commit a formula, never.
 'Tis "Jimflint."

Who commands our battalion in battle array,
"As in time of peace we prepare for the fray,"
While each of us thinks of the great judgment day?
 'Tis "Tapie."

Who teaches how to roll out a pill,
And make such mixtures as will fill the bill,
All of which we must taste though opposed to our will?
 'Tis "Jackman."

Who's he that's been with us for many a year,
That for his good fortune we give him much cheer,
And when he must leave us we'll all squeeze a tear?
 'Tis "Jordan."

Who are the ones that have been here a spell,
By the names of Bab, Colty, and Damon as well,
And also Old Hundred, Hal, Nick, and the Swell?
 They're Instructors.

“All We Like Sheep.”

On the second day of the ninth month, in the year eighteen hundred and ninety-five, a large flock of sheep was assembled in a green pasture beside the Stillwater. They came from Ohrowknow, Agedvillage, Quietstream and many distant meadows. Amid the bleating of the multitude could be distinguished such sounds as “Baa——ngor,” “Baa——ta.”

All that day and the day following, a great slaughter took place. The wild sheep and the black legs were shut out of the fold, and the lambs which had been “skinned” or “sheared” were sent to other pastures, for the wind is not tempered to the shorn lamb at Ohrowknow.

Those which remained were divided into four flocks, the members of which may be distinguished the one from the other thus:—The Senior by his erudition; the Junior by his superciliousness; the Soph by his gleesomeness; the Scrub by his modest confidence mingled with respectful deference.

Over all the sheep is a head shepherd; below him, under shepherds; and below them, sheep dogs.

The order of the days is this: At the eighth hour of the morning and every hour thereafter to the eleventh, the shepherds gather their flocks together and call them by name, and the sheep know their names and answer, “Here.” After the eleventh hour they call them no more till they have been fed, and the manner of feeding is this.

When the midday sun is hottest the pretty creatures seek the shelter of the “Oak,” and from there are admitted into a large pen. Here food is distributed by shepherds who move too slowly to please the eager animals, which do not hesitate to manifest their disapproval by loud cries. It is a noticeable fact that the white sheep eat more than the black. Why? Because there are more of them.

After being fed, some of the lambkins browse among the vials of the chemical laboratory, nibble electric currents, or placidly ruminate in the drawing room, while some of the giddy things gambol about, butting each other like goats and fighting for a pigskin. When the weather allows, all gather toward sundown, for a frolic on the green, led by the bell wether.

From the early hour at which they are gathered into their fold has come the phrase "to bed with the lambs."

After four years of this life they are presented with a sheepskin and sent forth among ravening wolves.

"It's a good thing, keep it yourself."

"Who moved Capt. Edgerley's tent?"

The class in Mechanics must have been taking an appetizer, for they thought it necessary to carry their dinner into examinations.

"We will sing psalm No. 26."

"I am afraid that solution would be like shadow soup."

"Honig konnen wir euch geben."

"Say! have you got a cigarette?"

"You cannot change those stars (* and **). Astronomy is a fixed science."

"Good morning! Have you joined the mustache club?"

The library seems to be quite an attractive place since so many young ladies have entered our institution.

"Where do they get the blue and green oil that they use in the colored lights about the station?"

Tape was feeling sleepy and so the Sophomores did not wake him in time for Guard Manual.

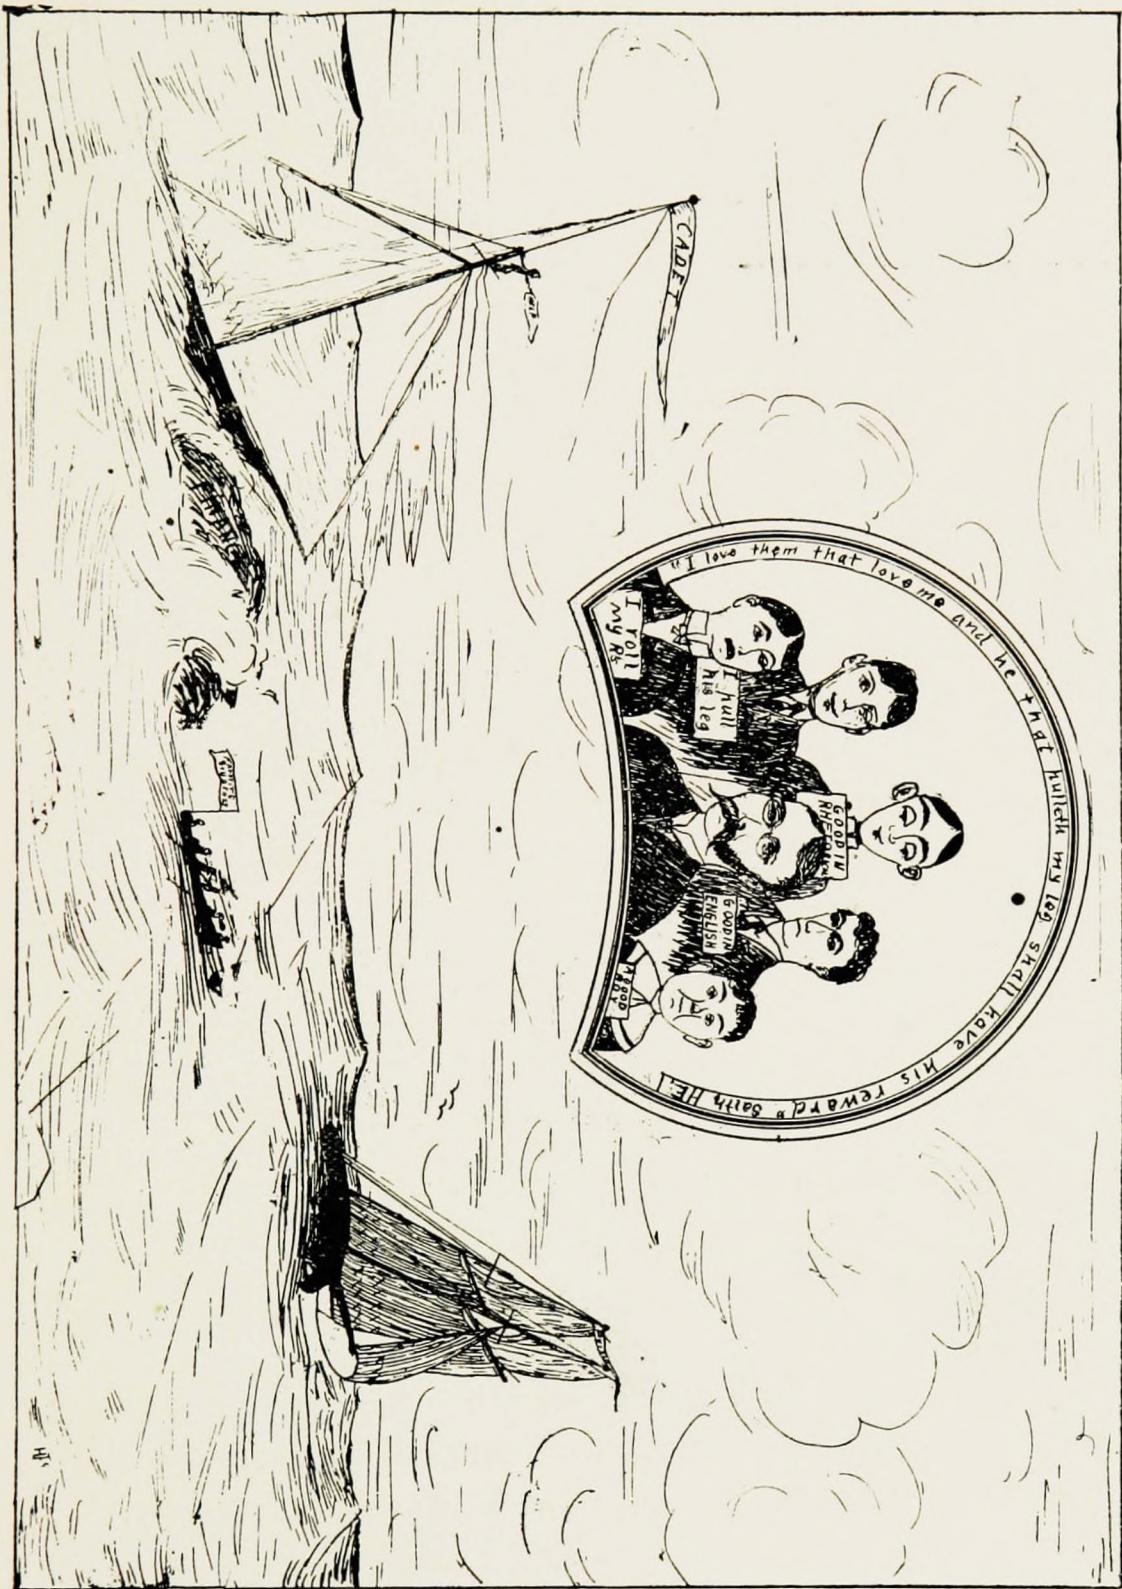

He—"Yes, I am a C. E. but I shouldn't advise you to take that course; there's so much in it no woman could do. Why you wouldn't be only half a civil engineer."

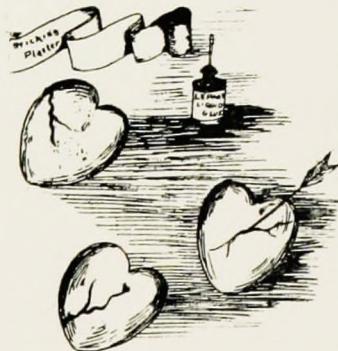

She (shyly) "I wouldn't mind being the better half."

Marginal note in Freshman's algebra—"Variation's the very spice of life."

Prof. Hart—"The singular of dice is die." This is in direct opposition to the proverb, "Never say die."

Unique is derived from two Latin words:—unus, one and equus, horse. Remembering the number of horses ridden by one student this year, we see this adjective to be obviously inapplicable to M. S. C.

There is in our college a beautiful dame,
That has Cupid's attractions as principal aim,
Who's convinced she is nearing the summit of fame.

She became so attractive that no more could she stay
With the rest of the students, but the organ must play,
And took that position, much to our dismay.

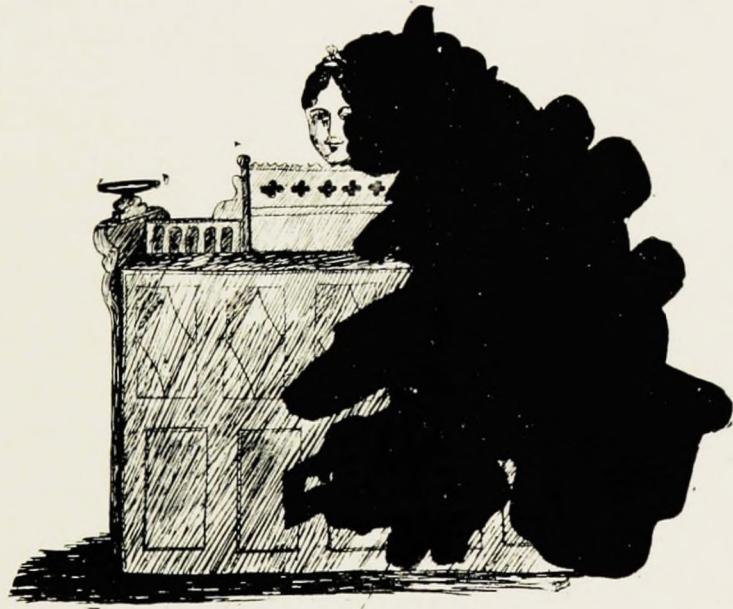

Our artist has worked with main and with might
To get the right posture, and in the right light,
And has on her picture worked many a night.

When she heard of his endeavors, all inflated with pride
She said: "This was an honor for which he had sighed,
An honor for which she would have willingly died."

Then she held her head high as her neighbors passed by,
For she reasoned: "They're not so distinguished as I,
How they'll envy me when I'm in print by-and-by."

Now I'm much afraid that this picture'll be jeered,
For the press was not right, and the printer's ink smeared,
And somehow the likeness seems horribly "queered."

Chapel Declamations.

† By special request.

H₂ O + ?

His head was sometimes patted,
It pleased him without doubt,
But being somewhat tender,
Full half his brains ran out.

They threw cold water on him
But found it was too late,
The moisture soon produced
A green precipitate.

The brains were duly bottled
For a quantitative test,
Per cent. water twenty-seven
And mucus for the rest.

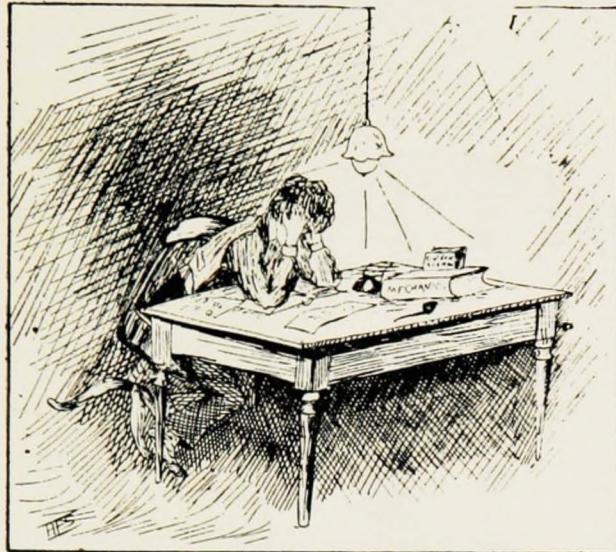

"The ninety and nine that need no repentance"—class '99.

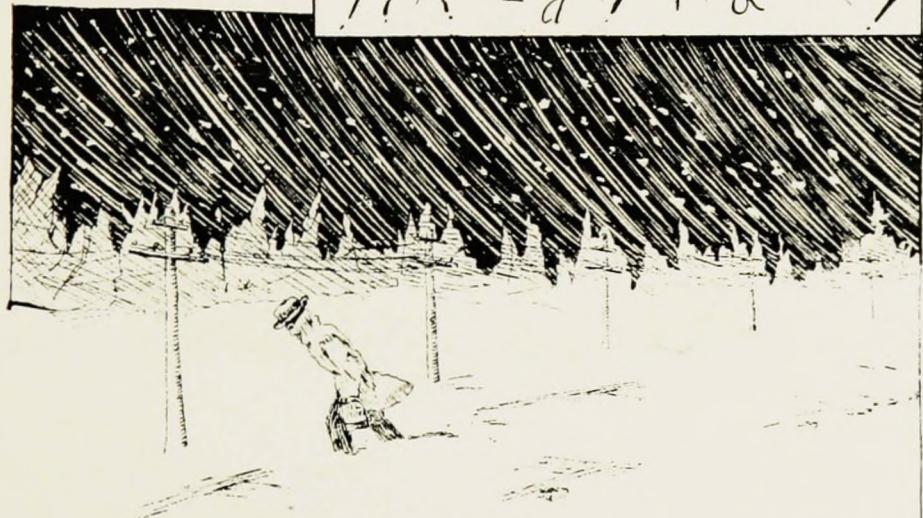

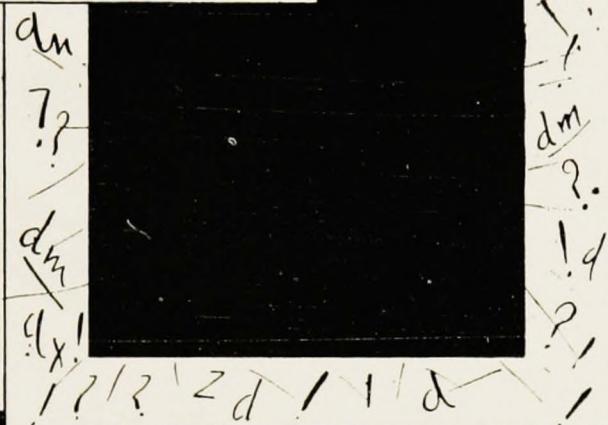

"Oh Mary had a little lamb
A little lamb
A little lamb
Oh Mary had a little lamb
And I a little pork."

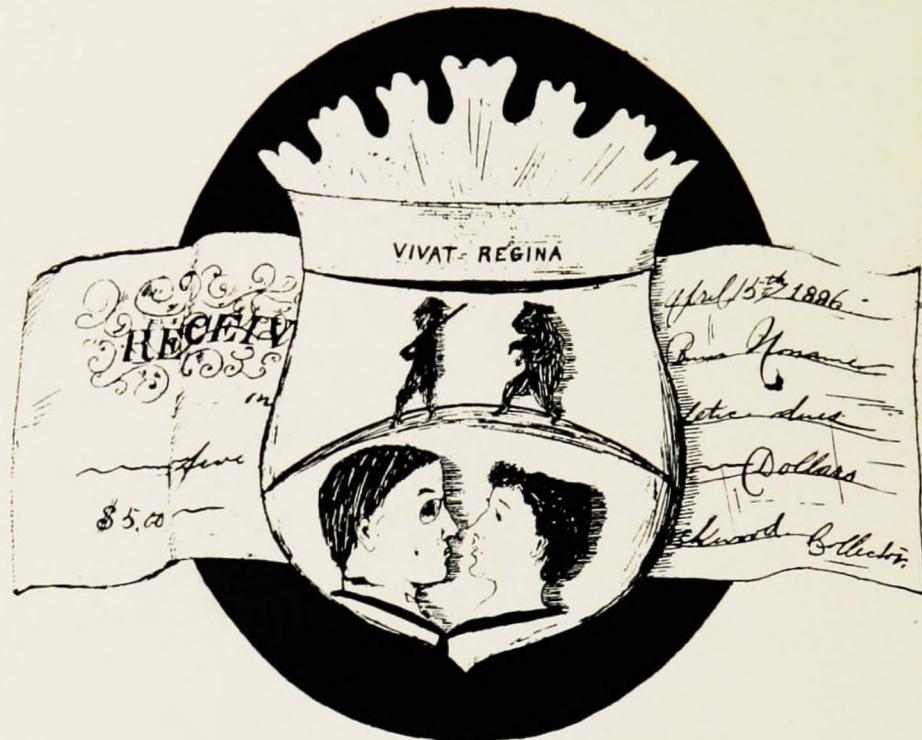

Miss Newrich—"Pa this book of etiquette says you must sit one foot from the table." Mr. Newrich—"I don't take no stock in books of etiquette. I sit two feet under the table."

We furnish our own
electric light.

To Bookbuyers.

WE are now carrying, of the Standard and Popular Literature of the Day, one of the most complete stocks to be found in any store in the country. We are in direct and constant communication with all the different publishers, and can supply any book in the market with the least possible delay. We buy in the largest quantities, and so are enabled to sell at the lowest rates.

We would most respectfully solicit not only your orders, but also your correspondence in regard to books, prices, etc., all of which shall have our most prompt and careful attention.

We issue, from time to time, catalogues and bulletins which are of special interest to every lover of good books. Should you like to receive copies of these, please send us your post-office address and we will mail them free of charge, keeping your name on our permanent list.

Please notify us of any change of address.

ASSETS, \$62,759,765.95

SURPLUS, \$7,096,256.43

JACOB L. GREENE, PRESIDENT.

THE CONNECTICUT MUTUAL renews its plea for pure Life Insurance: that men whose families need it buy the only thing a life insurance company can really give — the full, absolute and simple protection needed; that they cease to gamble with it or try to make a speculation out of it; and to all such the Company offers its best and most sincere endeavor, illustrated by its unparalleled record of fifty years.

PORTLAND.

S. C. DILLINGHAM, AGENT, MAINE STATE COLLEGE.

BLOCKITT keeps a Hat Store: sells nothing but hats; pays his rent, gas bills, advertising bills, sends the young Blockitts to college—all with the profits on hats.

SOCKITT keeps a Furnishing Goods store—sells nothing else. Store rent, house rent, butcher, baker, cocktail shaker—all have to be paid out of the profits on furnishing goods.

FROCKITT, Merchant Tailor, lives well on the profits of Clothing made to order.

RUSSITT keeps "well heeled" on the profits of the Shoe business.

We have as large a stock of Hats as Blockitt; we sell as many Furnishing Goods as Sockitt; we make as many Clothes to order as Frockitt; we sell as many Shoes as Russitt; and we combine all four with a Ready-to-Wear Clothing business large enough in itself to pay all our expenses and a good sight more.

Are we monopolists? No. We are simply Clothiers, in all that word implies. If people prefer to buy their

Hats, Furnishings and Shoes, as well as Clothing,

Of us, it is because they have found it profitable to do so. There is no sentiment in business.

.... THE

Maine State College, O

ORONO, MAINE.

A School of Science and Technology.

The Courses of Study leading to Degrees are nine, each requiring four years for completion:

The Latin-Scientific Course is designed for those who seek the college for general culture and training, and especially for those who expect to become teachers.

The General Scientific Course differs from the Latin-Scientific Course, in substituting modern languages for Latin. Students in either of these courses may devote especial attention to mathematics, physics, or natural history.

The Agricultural Course is designed for those who wish to become farmers, teachers or investigators in agricultural science, or editors of agricultural papers. In this course, agriculture is treated as a branch of technology. For those who wish practical rather than scientific training in agriculture, shorter courses are provided.

The Civil Engineering Course is designed for those who wish to become surveyors, railroad, highway, hydraulic, bridge or sanitary, engineers.

The Mechanical Engineering Course is designed for those who wish to become managers of manufacturing plants, or general mechanical engineers.

The Electrical Engineering Course is designed for those who wish to fit themselves for any line of practical work in electricity.

The Chemical Course is designed for those who wish to become professional analysts, teachers of chemistry, or managers of industries in which an extensive knowledge of chemistry is needed.

The Pharmacy Course is designed for those who wish to prepare themselves for the practice of pharmacy, and at the same time obtain a broad general training.

The Preparatory Medical Course is designed for those who propose to take up the study of medicine after graduation and wish to so shape their college work as to furnish the best preparation.

The Short Courses are as follows:

The Pharmacy Course, of two years, is designed for those who wish to obtain a practical training in pharmacy in the shortest time.

The Electrical Engineering Course, of two years, is designed for those who have time for only the practical training in electricity.

The Course in Library Economy, of one year, is designed for those who wish instruction in the care and management of libraries.

The Agricultural Courses, of one and two years, are designed for farmers.

The Training Courses, of six weeks each, in General Agriculture, in Dairying, and in Horticulture, are planned for farmers.

The College year is divided into two sessions beginning on the first Wednesday in February and September.

Rooms and Tuition are free.

98 Main Street, BANGOR.

Failed! Failed! Failed!

My neighbors knew I would. Cannot expect to sell goods in a dark and dirty store like that.

The above are facts. I have sold but few goods for the past five years, and at last have failed, just as was predicted, but have not become insolvent. I simply failed to have room for my increasing business, so had to have my store re-modelled to make more room, and in the meantime have had it cleaned and painted; and now my facilities are better for catering to my customers, in

**Fine Groceries (specialty), Provisions, Confections,
Tobacco and Cigars,** than ever in the past.

Do not believe what Dame Rumor says. Come in and be convinced. During the warm Summer months will have **ICE=COLD SODA** on draught, and am also prepared to make **MILK SHAKES**: these you will find quite refreshing.

OLD TOWN, May 23, 1896.

To Passengers.

WOULD respectfully state that I have on hand a good supply of Maine Central, Boston & Maine, and Bangor & Aroostook *mileage books*, which I let at $2\frac{1}{2}$ cts. per mile. As the regular fare on the Maine Central and Bangor & Aroostook above-named is nearly 4 cents per mile, you can readily see the point. I can sell you through to Boston at a saving, in this manner: Maine Central to Portland at $2\frac{1}{2}$ cts., and Boston & Maine at cost—2 cts. You will do well to call on me before purchasing your railroad fares. I can sell almost any size scrap that you wish.

Very truly yours,

THOS. MURPHY,

Ticket Broker.
